Professional Summary

Third-year Computer Engineering student at ENSA Fès (National School of Applied Sciences), specialized in data engineering and analytics. I build automated data pipelines, data warehouses and BI dashboards that turn large datasets into decision-ready insights, and I have worked on an AI-based computer vision project in a team. Analytical, curious and collaborative, I am motivated to apply data and AI to real business challenges in the energy sector and to grow within an international, fast-paced consulting environment.

Education

National School of Applied Sciences of Fès (ENSA Fès) – Engineering Degree, Computer Engineering **09/2022 – Present**
- Engineering program focused on software development, data engineering, Business Intelligence, Big Data and information systems.

Baccalauréat in Mathematical Sciences A – Lycée Tarik Ibn Zyad, Azrou **09/2019 – 06/2022**
- Distinction: Good (Assez Bien)

Professional Experience

Data Engineering Intern (PFA) – Ministry of Territorial Planning, Rabat **July – September 2026**

Designed and automated an ETL pipeline to process credit data and built a data warehouse to support analysis and BI dashboards for decision-making.
- Developed an ETL pipeline with PySpark to clean, transform and process credit data.
- Designed and populated a SQL Server data warehouse to make the data ready for analysis.
- Built Power BI dashboards to present key indicators; automated workflows with Apache Airflow and containerized the environment with Docker.
- Technologies: Python, PySpark, Airflow, Docker, SQL Server, Power BI.

Introductory Internship – EMS, Fès **June – July 2025**

Designed and developed a full-stack web application to collect, process and centralize technical, DNS, SEO and security data related to domain names.
- Centralized heterogeneous data in a PostgreSQL database and built a secure REST API (Flask/Python) with a React interface.
- Technologies: React, Flask, Python, PostgreSQL.

Academic Projects

Data Pipeline with Airflow, dbt and Snowflake **10/2026**
- Built an automated ELT pipeline transforming commercial data into analytical tables in Snowflake.
- Structured transformations with dbt (staging, intermediate and marts models); added data quality tests.
- Orchestrated daily runs with Apache Airflow and Astronomer Cosmos; containerized with Docker.
- Technologies: Python, Apache Airflow, dbt, Snowflake, SQL, Docker.

Business Intelligence – Decision-Support Dashboards for SNCF **04/2026**
- Designed a Talend ETL pipeline and a SQL Server star schema for 6 million records; built Power BI reports for decision-making.
- Technologies: Talend, SQL Server, Power BI.

VisionGuard – Intelligent Security System (team project) **02/2026**
- Developed with a team a real-time security system based on computer vision and facial recognition.
- Built an ASP.NET Core API and a React monitoring dashboard.
- Technologies: Python, OpenCV, T-SQL, .NET/ASP.NET Core, React.

Skills

- **Data & Analytics:** ETL/ELT, data modeling, data quality, Power BI, SQL, dbt, Snowflake
- **Data Engineering & AI:** Python, PySpark, Apache Airflow, Talend, Docker, computer vision (OpenCV)
- **Programming & Databases:** Python, SQL, Java, C, C#; SQL Server, PostgreSQL, MongoDB
- **Tools:** Git/GitHub, Postman, Agile/Scrum
- **Strengths:** analytical thinking, problem solving, teamwork, adaptability

Languages

- Arabic: native – French: B2 – English: B2
